

Commercial Monitoring

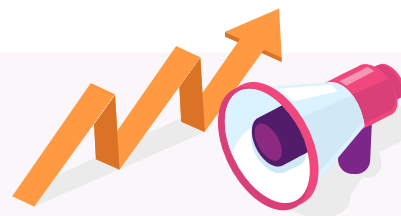

New features and enhancements for faster alerts and better performance

Whether you're in banking, leasing or alternative finance, keeping up to date with changes to the risk profile of your customers is critical to your bottom line.

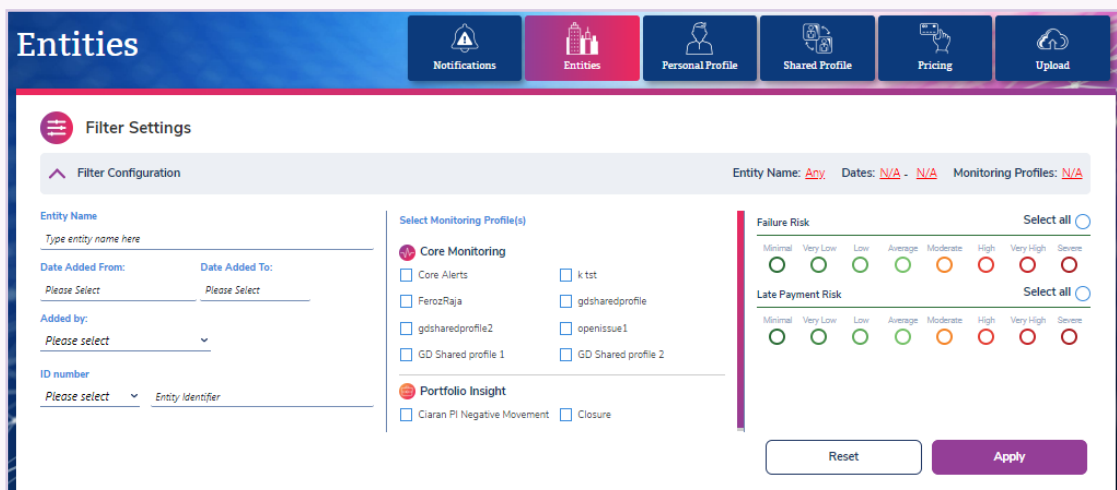

Our new-look Commercial Monitoring solution not only delivers a refreshed user experience but comes with a range of new features and enhancements to help make risk management easier.

Product enhancements

Functionality

Greater flexibility and customisation to risk monitoring profiles and comprehensive alert triggers ensure your business has a complete and accurate risk assessment on entities you choose to monitor.

Performance

Improved processing time on monitoring alerts, new infrastructure and a rebuild of our commercial database structure ensures a smooth and reliable monitoring experience for your business.

The screenshot shows a complex alert configuration interface. It is divided into several sections, each with a 'Select all' button. The sections include:

- General Alerts (0 of 22 selected):**
 - General:** Company Status, Court Actions, Defaults, Solvency, Director / Officeholder, ABR Details, ABN Status, Public Filings, Collections, Director Adverse, Financials Lodged.
 - Shareholder Changes:** Issuance & Cancellation, Share Details.
 - Distress & Closure:** Wind Up Actions, Administration, Liquidation & Receivership, Deregistered.
 - Company Details:** Company Type, Company Name, Address Change, Constitution, General.
- Score Alerts (6 of 28 selected):**
 - Failure Risk Score:** Negative Band Changes (Very Low, Low, Average, Moderate, High, Very High, Severe) and Positive Band Changes (Minimal, Very Low, Low, Average, Moderate, High, Very High).
 - Late Payment Risk Score:** Negative Band Changes (Very Low, Low, Average, Moderate, High, Very High, Severe) and Positive Band Changes (Minimal, Very Low, Low, Average, Moderate, High, Very High).

Usability

Complete redesign of our monitoring interface to ensure ease of use for all users in your business with easy to follow up-to-date information relevant to your risk monitoring portfolio.
