

Once you have connected the business you can access a check by clicking on the details page. If you have already checked the business from the search page you won't use up another check.

Clicking on the details link on the business you want to check - it's the same on both dashboard and watchlist business lists.

The details link takes you to that business's page - you can access a lot more information from this page than a check and our business page guide will talk more about that.

**Registered name and business identifiers**

**Current status of the business and the date they were registered**

**Key parent company details**

**The industry of the business**

**Registered address**

**An indication that adverse information may be available. You will need to order a Verify or Assess report to see the details**
